

STARGATE Workshop 5

Practical solutions for reducing waste/ valorisation strategies: functional phenotyping towards a circular economy

Aim | Address the recent advances in circular economy in food systems and how the phenotyping technologies and phenomics infrastructures may support the development of an inclusive and circular economy. Case studies will be presented.

Target Group | **Non-STARGATE partner entities are welcome** (up to 20 participants). Priority will be given to STARGATE partners (up to 20 researchers).

Date | January 30th, 2024, face-to-face theoretical sessions.

Fees | For STARGATE partner organisations researchers, travel and accommodation costs are free of charge. The workshop includes lunch.

January 30th, 2024

FREE REGISTRATION!

(press the box)

Workshop venue | Universidade Católica Portuguesa, Porto, Portugal

This Project received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952330.
